Claim 8 is objected to because of the following informalities: In claim 8, line 8, "age insulation film" is incorrect. Also, "suppress" is misspelled. Appropriate correction is required.

Claims 1,2,4 and 6-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Hobbs et al and Tsunashima et al.

The rejection is maintained as stated in the paper mailed 4/21/04 to be applied to claims 1,4-7,12 and 13. Applicant's argument that Hobbs et al does not contain disclosure of inclusion of  $\text{TiO}_2$  is not persuasive because Hobbs et al was not relied upon as containing that teaching. Tsunashima was instead relied upon as containing suggestion to include  $\text{TiO}_2$  in the gate dielectric of Hobbs et al.

Applicant's argument regarding the thickness of Hobbs et al is not persuasive because there is overlap at the recited 2 nm. Furthermore, one of ordinary skill in the art would have been led to the recited thickness through routine optimization to achieve desired threshold voltage of the transistor produced, for example.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory
